

TEXAS TECH UNIVERSITY
HEALTH SCIENCES CENTER

FACT BOOK

Tenth Edition

January, 2004
Prepared by the Office of the
Executive Vice President for Finance & Administration

PREFACE

The Office of the Executive Vice President for Finance & Administration is pleased to provide the Texas Tech University Health Sciences Center with a Fact Book. This edition is the tenth annual issue produced by this office as a service to the Health Sciences Center.

We offer this Fact Book as a means of providing a common set of data which will be readily available to decision-makers throughout the Health Sciences Center. We hope that the Fact Book will also aid in achieving the institution's goal of providing the highest standard of excellence in higher education while pursuing continuous quality improvement, stimulating the greatest degree of meaningful research, and supporting faculty and staff in satisfying those whom we serve.

This Fact Book can be accessed on-line at the TTUHSC home page, www.ttuhsc.edu.

We encourage and invite comments, reactions, suggestions, and corrections as a means of improving future issues.

MISSION STATEMENT

TEXAS TECH UNIVERSITY HEALTH SCIENCES CENTER

MISSION STATEMENT

Texas Tech University Health Sciences Center (TTUHSC) pioneered regionalized higher education in the health sciences in Texas and now educates students in Amarillo, Dallas, El Paso, Lubbock, Midland, and Odessa. TTUHSC consists of the schools of Medicine, Nursing, Pharmacy, Allied Health Sciences, and Biomedical Sciences, and it is developing a second medical school which will be located on the U.S.-Mexico border.

The mission of TTUHSC is to provide excellence in the education of health care professionals to serve the West Texas region, the state of Texas, and the nation through innovations in technology, research, and patient care.

TTUHSC fulfills its higher education mission by achieving four strategic goals:

- Develop professionals today to meet the health challenges of tomorrow
- Demonstrate excellence in serving targeted healthcare needs
- Pursue new knowledge in the life sciences and apply research to improve health outcomes
- Optimize organizational effectiveness and efficiencies

TTUHSC is committed to excellence in undergraduate, graduate, professional, and continuing education, with an emphasis on reducing health disparities through initiatives in community, border, and rural health care. Because basic science supports education and patient care, TTUHSC faculty are engaged actively in basic and clinical research. And as the only health-related institution of higher education in West Texas, TTUHSC recognizes the importance of community service, emphasizes preventive and primary outpatient care, and partners with its affiliated hospitals in offering tertiary and other specialized healthcare programs throughout this vast region.

HISTORY

TEXAS TECH UNIVERSITY HEALTH SCIENCES CENTER

History

The Texas Tech University School of Medicine was created by the 61st Texas Legislature in May, 1969 as a multi-campus institution with Lubbock as the administrative center and with regional campuses at Amarillo, El Paso, and Odessa. In 1979, the charter was expanded to become the Texas Tech University Health Sciences Center (TTUHSC), leading the way for establishment of the Schools of Nursing and Allied Health Sciences, and the Graduate School of Biomedical Sciences. In 1993, the legislature authorized the establishment of a School of Pharmacy to be located in Amarillo. In addition, Allied Health Sciences programs were also expanded to Amarillo and the Permian Basin. The five schools are committed to regionalized, multi-campus educational experiences, and to the related biomedical research, graduate studies, patient care and community service required of a health sciences center. A primary effort is made to achieve a balanced group of students with qualified minority students, diverse age groups, and heterogeneous backgrounds in educational and life experiences. A special effort is made to recruit applicants from West Texas and from rural and border communities.

The Health Sciences Center has as its major objectives the provision of quality education and the development of academic, research, patient care, and community service programs to meet the health care needs of the 108 counties of West Texas, which comprise 48% of the land mass and 12.5% of the population of the total state. This 131,000 square mile service area and population of 2.6 million has been, and remains highly underserved by health professionals and accessible health care facilities, despite the substantial and meaningful contribution made by our institution. Demographic shifts in West Texas populations, as well as socioeconomic and epidemiologic characteristics of its subgroups, create major and specific demands for service. While education of students and residents remains the primary focus of the institution, there has been an important impact on the health status of West Texas. The lack of a single locus of population density has resulted in the regionalization of medical and health care education and patient care on four geographically separated campuses. In providing an excellent quality undergraduate, graduate, and continuing health professional education at each site, the health needs of the larger community have been better met and relevant indices of health status demonstrate significant improvement.

The growing evidence confirms that the School of Medicine is accomplishing its mission of educating and placing practicing physicians in West Texas. Over 20% of the physicians currently practicing in West Texas are Texas Tech medical school or residency graduates. With increasing demand for medical education, primarily along the Texas/Mexico border, legislation was signed in October, 2003 establishing a new four-year medical school in El Paso. The Schools of Nursing and Allied Health Sciences continue their impact on the health care needs of West Texas, with most of their graduates remaining in West Texas to pursue their chosen profession. Since graduating its first class in 2000, over 80% of School of Pharmacy graduates have chosen to practice in Texas.

TTUHSC is a component of the Texas Tech University System. The President of TTUHSC reports to the Chancellor, who is the Chief Executive Officer of the System. The Chancellor and the President are responsible to the Texas Tech University Board of Regents, which sets overall policy for the Texas Tech University System, Texas Tech University, and TTUHSC. The current members of the Texas Tech University Board of Regents are as follows:

<u>Regent</u>	<u>Term Ends</u>	<u>Hometown</u>
Carin M. Barth	Jan. 31, 2005	Houston, Texas
C. Robert “Bob” Black, Chair	Jan. 31, 2007	Horseshoe Bay, Texas
E.R. “Dick” Brooks	Jan. 31, 2005	Granbury, Texas
F. Scott Dueser	Jan. 31, 2009	Abilene, Texas
L. F. “Rick” Francis	Jan. 31, 2007	El Paso, Texas
J. Frank Miller, III	Jan. 31, 2009	Dallas, Texas
Brian C. Newby, Vice Chair	Jan. 31, 2005	Fort Worth, Texas
Windy M. Sitton	Jan. 31, 2009	Lubbock, Texas
Bob L. Stafford, M.D.	Jan. 31, 2007	Amarillo, Texas

The Deans of the Schools of Medicine, Nursing, Allied Health Sciences, Pharmacy and the Graduate School of Biomedical Sciences report to the Chief Executive Officer of the Health Sciences Center. Administrative governance and authority of the medical school is situated at Lubbock, and the Dean, as Chief Academic Officer, is fully responsible for the conduct and maintenance of quality educational experiences and related academic and clinical programs offered by the campuses at Amarillo, El Paso, and Odessa . The Regional Deans of Medicine at Amarillo, El Paso, and Odessa are responsible to the Dean of the School of Medicine in Lubbock for academic programs enabling the Dean to maintain quality assurance in the academic program. The Schools of Nursing and Allied Health Sciences utilize the same administrative mode. Regional Deans of Allied Health Sciences in Amarillo and Odessa, and a Regional Dean of Nursing in Odessa report directly to their respective Deans in Lubbock. This regional concept allows the Schools to establish and operate student education programs, physician residency training programs, continuing education programs, and outreach programs that have proven to be a vital factor in the placement of graduates in practice sites in West Texas, and to support the practice of medicine, nursing, and allied health sciences in this vast area. The Dean of Pharmacy is located in Amarillo and reports to the Chief Executive Officer. Regional Deans of Pharmacy are located in Lubbock and Dallas, and report to the Dean of Pharmacy.

The Billing and Compliance Program, formerly known as the Institutional Compliance Program, has undergone enhancements and has recently been transferred to the School of Medicine. The Billing and Compliance Program enhancements were enacted to better ensure consistent program implementation and prompt billing compliance feedback to all involved parties. The new plan builds upon past successes and features a streamlined organizational structure, which will be 100 percent dedicated to the Billing Compliance mission, and should reduce billing compliance workloads by departmental staff. An example of reduced workloads at the departmental level is the transfer of the Medicare and Medicaid Exclusion List screening duties to the new Billing Compliance staff. The new plan establishes reliable processes, instills objective, realistic standards, and sets personal and institutional expectations. The Billing Compliance Program is changing oversight, but its mission will remain to ensure that we conduct our programs in an ethical manner, compliant with the laws of the land.

An institutional philosophy that further supports quality services to the students, patients, faculty and staff was enhanced in the fall of 1990. The thrust of the initiative is three-fold: provide customer service skills training to employees, assist departments in quality improvement efforts, and recognize individuals and teams for excellence in quality service. The initiative is called *SERVICEplus*. The customer awareness

program of *SERVICEplus* helps employees identify who they serve and to understand and exceed the needs and expectations of these constituents. The Office of Quality Service was created in 1993 to serve as an advocate and focal point for customer service issues.

In addition, the office also coordinates an annual quality service recognition program for staff employees. This prestigious award recognizes staff employees who have been continuously employed at Texas Tech in a benefits-eligible position for at least two years, who have completed the *SERVICEplus* educational program, and who demonstrate excellence in service. Two levels of awards exist: The Quality Service Award and the Chancellor's Award of Excellence, whereby honorees receive a plaque, certificate, and a monetary award ranging from \$500 to \$1,500.

Since 1990, things have evolved and additional initiatives were put in place, including *PATIENTfirst*, *STUDENTfirst*, and *PEOPLEfirst* - all meant to put our patients, students and staff first. The Health Sciences Center's Office of Customer Service works with clinical departments, training department, and other institutional areas to ensure that these initiatives are carried out. The Office of Customer Service, along with Human Resources, also hosts a monthly Welcome Event for new employees, providing them with a broad overview of institutional information. In the Fall of 2003, the Health Sciences Center Relations Office took over administrative oversight for the Quality Service Awards Program.

The Health Sciences Center is continually striving to make the institution and its programs the most cost effective possible. This has been particularly important for the past few years when this young institution has been growing and developing its programs. In 1985, general revenue made up more than 50% of the total operating budget of the Health Sciences Center. Now, in fiscal year 2004, general revenue is approximately 25.2% of the total budget. Even though the Health Sciences Center has been able to sustain the growth of its schools and programs, adequate levels of state appropriated funds are essential to accomplish the central mission of providing health care education of the highest quality.

The Health Sciences Center is proud of the accomplishments that have been achieved by this institution. Some of these include:

SCHOOL OF MEDICINE

- Through June, 2003, the School of Medicine has graduated 2,436 physicians. Over the past ten years, approximately 58% of graduates have remained in Texas to complete residency training, and an average of 24% of School of Medicine graduates have remained in a Texas Tech program for residency training.
- Over twenty percent of the practicing physicians in West Texas are Texas Tech medical school and/or residency graduates.
- Over the past four years, an average of 50% of all medical school graduates have elected to enter the primary care specialties of Family Medicine, Internal Medicine, Obstetrics and Gynecology, and Pediatrics. In 2003, 47% of graduates elected primary care specialties.

- Each of the four TTUHSC campuses has been shown to place the majority of its program graduates who stay in West Texas within a 75-mile radius of the campus. The four campus system, therefore, has a positive impact on the geographic distribution of physicians throughout West Texas.
- In the summer of 1998, the School of Medicine began its joint venture with the College of Business Administration for a combined MD-MBA program, one of only two four-year programs in the country. Each year, 8-10 first-year students are admitted into the program. In June, 2001, the School of Medicine graduated its first three MD-MBA students, six graduates completed the combined degree program in May, 2002, with an additional six completing in May, 2003.
- The four campuses of the School of Medicine operate 33 individually accredited residency programs and 4 fellowship programs in West Texas. As of November, 2003, these programs had 512 total residents in training, including 18 fellows, of which 317 (62%) were in primary care fields of Family Practice, Internal Medicine, Med/Peds, OB/GYN and Pediatrics. Of the 317 total primary care residents in training, 91 are specifically in Family Practice. The 33 residency programs have 165 first year trainees, and will graduate approximately 153 residents and fellows in 2004.
- The four campuses operate a total of 34 clinical departmental units and numerous clinical services and education programs which were previously unavailable in the West Texas region. A partial list of specialty services includes: Care for Women and Infants, including perinatal care and neonatal intensive care (four campuses), Pediatric subspecialty services and intensive care (four campuses), trauma centers and emergency medicine (two campuses), neurology and neuroscience centers (two campuses), a center for pain treatment and research, a regional burn center, a center for Alzheimer's disease, a cancer center and a program for bone marrow transplantation, a border community breast care program, and a rural community mobile mammography program. Recognition has been received for research in such areas as cardiovascular disease, alcohol toxicity, reproductive biology, steroidogenesis, and sick building syndrome.
- The patient care programs of the School of Medicine serve as the base for clinical education of medical students and residents, the base for clinical research and as a major source of care for citizens of West Texas. In fiscal year 2003, the combined four campuses of the School of Medicine provided 577,803 clinical visits of care to 214,947 ambulatory patients. The School also served 50,390 inpatients in its affiliated hospitals. The four campuses provided 301,897 clinical visits of charity care to 88,454 patients valued at \$63,841,018.

GRADUATE SCHOOL OF BIOMEDICAL SCIENCES

- The Graduate School of Biomedical Sciences, originally a part of the School of Medicine, became a separate school in 1994 to coordinate the training of biomedical scientists. The M.S. and Ph.D. programs provide educational opportunities for students from this region who seek research careers in the biomedical sciences to advance our knowledge about normal and diseased conditions in humans.

- The Graduate School of Biomedical Sciences currently has eight graduate programs, with a Fall, 2003 enrollment of 75 students. The School has graduated 61 M.S. and 118 Ph.D. students since 1972. Some graduates of these programs work in private industry, however, most hold postdoctoral fellowships and faculty positions at major medical schools throughout the United States and abroad.
- The M.D./Ph.D. combined degree program has graduated six M.D./Ph.D. students, and has three students currently enrolled. GSBS graduated their first husband and wife team in May, 2002, awarding both with an MD/PhD degree.

SCHOOL OF NURSING

- The School of Nursing began in 1979 with the development and accreditation of the Continuing Nursing Education (CNE) Program. The TTUHSC School of Nursing CNE Program was the first nationally accredited program in the State of Texas. It continues today to meet the needs of West Texas nurses with timely topics made available to rural health areas.
- Since its inception, the School of Nursing has planned its degree programs to meet the needs of West Texas. Baccalaureate students were admitted in Lubbock in 1981, and two years later in the Permian Basin. The baccalaureate program is also available to the Hill Country. The Master of Science in Nursing program enrolled its first students in 1988. Today, there are graduate level offerings in administration, education, five advanced practice areas, post-masters certifications, a collaborative advanced practices program with the University of Texas at Tyler, and a collaborative Ph.D. program with Texas Women's University.
- School of Nursing has become a nationally recognized leader in geriatric education, partnering with other disciplines in the Health Sciences Center and providing state-of-the-art research education, and practice experiences at the new Mildred and Shirley L. Garrison Geriatric Education and Care Center. The School of Nursing received the top national award for Exceptional Baccalaureate Curriculum in Gerontologic Nursing from the Hartford Institute for Geriatric Nursing in collaboration with the American Association of Colleges in Nursing in Fall, 2002.
- Nurse-managed Nursing Practice arrangements provide primary care services to underserved populations in Lubbock and Odessa.
 - ▶ **The Wellness Center** serves residents in East Lubbock within a medically-underserved area. The non-profit nurse-managed clinic, located at 3703 Avenue A, provides essential health care to nine Lubbock economically deprived census tracts. Medical oversight is provided by TTUHSC Departments of Family Medicine and Internal Medicine. The clinic also serves as a clinical learning site for students. Goals of the Wellness Center include:

- Provide primary care services and disease management programs for obesity, hypertension, diabetes and asthma;
 - Conduct a comprehensive health education program targeted at obesity, hypertension, diabetes and asthma;
 - Collaborate with Lubbock ISD to recruit disadvantaged students into health care careers;
 - Provide clinical experiences for SON graduate and undergraduate students in Wellness Center areas;
 - Evaluate outcomes of the nurse-managed primary care services; and
 - Implementation of the Senior House Calls program.
- ▶ **The Permian Basin Nursing Center** is a nurse managed health care facility. It is housed in the Texas Tech Health Center on the Odessa campus. Services provided include infection control and diabetic education. In addition, the Center serves as a clinical lab site for RN-BSN and graduate students.
- The Graduate Program offers master's, post-master's and doctoral programs:
 - Master of Science in Nursing with a focus on Education or Administration in conjunction with a clinical focus in Community Health or Gerontics;
 - Master of Science in Nursing/Master of Business Administration in collaboration with Texas Tech University College of Business Administration;
 - Advanced Nursing Practice Tracks at both master's and post-master's levels:
 - Family Nurse Practitioner
 - Acute Nurse Practitioner
 - Pediatric Nurse Practitioner
 - Geriatric Nurse Practitioner
 - Collaborative program with the University of Texas at Tyler School of Nursing offering all the Advanced Nursing Practice Tracks
 - Collaborative Ph.D. program with Texas Women's University
 - Spring 2003 implementation of a sub-series master's track in Clinical Research Management
 - Classes offered in Lubbock, Odessa, Tyler and the Hill Country using a variety of distributive methods including interactive television and web-based technology
 - Greatest percentage of enrollment increase in the Education track due to scholarships provided by a Department of Labor grant.

- The Research Program offers assistance to faculty and students in conducting research, as well as applying for external and internal funding. The remainder is from the practice plan, grants, contracts and endowment funds. The Strategic Plan of the School of Nursing includes increasing extramural funding through research and grants.
- The School of Nursing is moving toward a research mission, as is all of TTUHSC. Many initiatives are underway to improve the research enterprise. Within the School of Nursing, grant and research funding have increased substantially. Major grant proposals submitted in AY 2003 totaled \$8,324,776. An amount of \$1,737,770 was captured in federal, state and local grants.
- Nine extramural grants are in development for AY 2003 funding through the Research and Practice Program. Grant application programs include the funding agencies of B. Kommen Foundation, Abell-Hanger Foundation, Robert Wood Johnson Foundation, The CH Foundation, Texas Higher Education Coordinating Board, Helene Fuld Foundation, Health Resources and Services Administration in the United States Department of Health and Human Services, and the U.S. Department of Labor.

SCHOOL OF ALLIED HEALTH SCIENCES

- The School of Allied Health Sciences offers thirteen different doctoral, masters and baccalaureate health professions degree programs in the rehabilitation sciences, clinical laboratory sciences, speech, language and hearing sciences, and disciplines related to primary care. With a Fall 2003 enrollment exceeding 700 students on four campuses (Lubbock, Amarillo, Odessa and Midland), it is the largest School of Allied Health Sciences in Texas, and one of the most diverse and fastest growing institutions of its kind in the nation. The School has successfully developed and implemented ten new or upgraded academic degree programs since 1998. These programs are already producing their first cohorts of highly qualified allied health professionals who are serving the people of West Texas, the state and the nation.
- Academic degree programs offered include Doctor of Audiology (Au.D.); Doctor of Science in Physical Therapy (Sc.D., PT); Master of Science degrees in Molecular Pathology, Rehabilitation Science, and Speech-Language Pathology; professional Masters' degrees in Athletic Training (MAT), Occupational Therapy (MOT), Physical Therapy (MPT), Physician Assistant Studies (MPAS), and Rehabilitation Counseling (MRC); and Bachelor of Science degrees in Clinical Laboratory Science, Speech, Language and Hearing Sciences, and Clinical Services Management.
- To increase educational access to allied health professionals who are serving communities throughout rural West Texas and the state, some programs rely extensively on non-traditional formats or distance education technologies. The Sc.D., PT employs a unique combination of weekend clinical clusters in communities around the state, that are supported by distance education technology, as well as short, intensive periods on campus, to offer practicing Physical Therapists the opportunity to achieve advanced clinical skills and competencies while maintaining their practice. The M.S. in

Rehabilitation Science provides an internet-based opportunity for baccalaureate degreed PT's, OT's and other health professionals to upgrade their knowledge and skills, without leaving their communities. Similarly, the Master of Rehabilitation Counseling provides an opportunity for vocational rehabilitation counselors of the Texas Rehabilitation Commission, other State agencies and within the private sector to obtain their professional credentials while continuing to serve their clients. The Bachelors of Science in Clinical Services Management provides a web-based baccalaureate opportunity for graduates of community college Associate of Applied Science programs to prepare for career ladder progression, while continuing employment within their communities.

- With the Summer 2002 session, the School admitted its first cohort of students into its “first-in-the-nation” Master of Science in Molecular Pathology program. This program, which is supported by extensive institutional investments in a state-of-the-art “gene-testing” laboratory, offers students the theoretical knowledge and technical skills needed by molecular diagnostics and forensics laboratories within the state and throughout the country.
- In addition to its thirteen different degree programs, all of which are accredited for the maximum periods allowable by their respective accrediting bodies, the School operates two Centers that have been approved by the Board of Regents:
 - The Center for Brain Mapping and Cortical Studies, within the Department of Speech, Language and Hearing Sciences, seeks to integrate and support cross-disciplining efforts in research, teaching and patient care that are aimed at increased understanding of the human nervous system and enhanced treatment of neural pathology.
 - The Center for Clinical Rehabilitation Assessment within the Department of Rehabilitation Sciences consists of three clinical research laboratories (Gait Evaluation Laboratory, Balance Assessment Laboratory, and Energy Cost Assessment Laboratory), and integrates and promotes interdisciplinary research and clinical services in the Rehabilitation Sciences.
- Personnel shortages continue in many of the Allied Health Sciences professions. Shortages are most acute in the clinical laboratory sciences, and for speech-language pathologists, audiologists and physician assistants. Increasing demands for physical therapists and occupational therapists are projected for the foreseeable future to meet the needs of an aging population. Similarly, the demand for certified and licensed athletic trainers is expected to grow dramatically within our society.
- The School has an active faculty development program to encourage and provide financial support for faculty who participate in doctoral studies. With critical, national shortages of doctorally prepared faculty in the School's disciplines, this “grow your own” approach continues to strengthen the knowledge, skills and abilities of our faculty.

- Departments within the School of Allied Health Sciences include:

Laboratory Sciences and Primary Care

M.S., Molecular Pathology
Master of Physician Assistant Studies (M.P.A.S.)
B.S., Clinical Laboratory Science

Rehabilitation Sciences

Doctor of Science (Sc.D.) in Physical Therapy
M.S., Rehabilitation Science
Master of Athletic Training (M.A.T.)
Master of Occupational Therapy (M.O.T.)
Master of Physical Therapy (M.P.T.)
Master of Rehabilitation Counseling (M.R.C.)
B.S., Clinical Services Management

Speech, Language and Hearing Sciences

Doctor of Audiology (Au.D.)
M.S., Speech-Language Pathology
B.S., Speech, Language and Hearing Sciences

SCHOOL OF PHARMACY

- Texas Tech University Health Sciences Center School of Pharmacy was established in 1993 to offer the degree of Doctor of Pharmacy (Pharm.D). The School began accepting applications and enrolled its first class of 63 students in the fall of 1996. Each fall since 1996, the School has enrolled a new class. The founding class graduated in May, 2000.
- The School's vision statement reflects the changing responsibilities of the pharmacist and the role of the educator in the process. The School is learner-centered, collegial in nature, and uses state-of-the-art technology to cultivate practitioners dedicated to providing a high standard of care for their patients. The curriculum is based around a problem-based learning model and provides a stimulating and innovative cooperative educational environment.
- In addition to the traditional Pharm.D. program, the School also provides a Ph.D. program in the basic pharmaceutical sciences.

- In June of 2000, the American Council of Pharmaceutical Education (ACPE) granted the School full accreditation status.
- To provide significant and varied clinical experiences during the last two years of the curriculum, students are assigned to clinical rotations in Amarillo, Lubbock, El Paso and Dallas/Fort Worth.
- The School is committed to providing West Texas with innovative pharmaceutical care. The faculty and residents of the School provide patient care through various contracts with external health care institutions including hospitals, community pharmacies, nursing homes, clinics and the Texas Department of Criminal Justice.
- The School has opened five pharmacies. Developed as model teaching pharmaceutical care pharmacies in Texas Tech clinics, these pharmacies emphasize comprehensive pharmaceutical care. The pharmacies include:
 - Amarillo: Amarillo Pharmaceutical Care Center
 - Dallas: Texas Tech Pharmacy at Central Dallas Ministries Clinic
 - El Paso: El Paso Pharmaceutical Care Center
 - Lubbock: International Pain Center Pharmacy
Medical Office Building Pharmacy Southwest
- In addition to its direct patient care initiatives, the School supports a significant research program. The School of Pharmacy building houses approximately 35,000 square feet of laboratory space. Current efforts include research targeted at drug delivery, drug metabolism, blood brain barrier, cancer, immunology, molecular biology, pharmaceuticals pharmacokinetics and pharmacoeconomics. The School has received significant research grants and contracts, including one AACP New Investigator Awards and ten NIH grants. The annual Marsh Lectureship brings world renowned research experts in neuroscience and addiction to visit the School and give invited lectures to the TTUHSC Amarillo campus.
- The School has four research centers, Vascular Biology, Stroke, Pediatric Pharmacology, and Cancer, and participates with the School of Medicine Amarillo faculty in a new university designated Research Center of Excellence in Women's Health.
- The School's Dallas/Fort Worth campus relocated to the North Texas Veterans Affairs Medical Center in Dallas in July 2002. The VA totally renovated a building to house the School. The facility was expanded by an additional 3,000 square feet during the summer of 2003 to allow for case study rooms, additional faculty offices, and a student lounge.
- The School has clinical affiliations with some of the leading chain and independent pharmacies and hospitals throughout its four-campus region.

HEALTH CARE SYSTEMS

During the 1993 Legislative session, the Texas Legislature established a Correctional Managed Health Care Advisory Committee (CMHCAC) and charged it with developing a managed health care delivery system to provide health care to Texas Department of Criminal Justice (TDCJ) offender-patients. The Committee established a contract with TTUHSC to provide health care for the TDCJ facilities in the Western part of the state. Of the approximately 130,000 inmates housed in TDCJ facilities, the Western sector has approximately 32,000 beds in 26 facilities at 19 sites. Included is a 550-bed psychiatric hospital located in Lubbock which opened in July 1995. A tertiary medical/surgical prison hospital adjacent to the psychiatric hospital opened September, 1996 with medical/surgical care provided by the TTUHSC School of Medicine. TTUHSC is responsible for providing ambulatory care at the TDCJ facilities, developing Preferred Provider Networks and operating a telemedicine program. In addition, TTUHSC is responsible for contracting with the local community hospitals and staffing new facilities. During the 1995 Legislative session, the Texas Legislature expanded the CMHCAC role allowing it to contract with other state agencies to provide them with managed care services. As a result of this action, effective September 1, 1995, TTUHSC began providing managed health care services to five Texas Youth Commission (TYC) facilities, with approximately 1,100 youth located in Brownwood, Pyote, Sheffield, Vernon, and El Paso. During the 1999 Legislative Session, the Committee was renamed the Correctional Managed Health Care Committee (CMHCC) and three public members were added. Additionally, the Committee's oversight and compliance roles were strengthened.

Psychiatry support for TDCJ was moved to TTUHSC on January 1, 1996, with TTUHSC providing the mental health care in West Texas. Pharmacy services for the TDCJ contract are provided through a central contract managed by the TTUHSC School of Pharmacy in Amarillo.

The role of the correctional telemedicine program is to provide specialty consults for the TDCJ inmates by connecting correctional unit clinics with medical school consultants at TTUHSC in Lubbock. It reduces backlog in needed specialty clinics and initiates a referral pattern to the TTUHSC specialists who service the prison hospitals. The telemedicine program has also been a public safety tool by reducing the need to transport inmates from prisons to receive specialty care. The correctional telemedicine system is located in 15 of the 26 prison units served by TTUHSC. With deployment of telemedicine in the larger units and at sites with multiple prison units, 92% of the inmates served by TTUHSC have telemedicine access.

In October, 1995, Correctional Health Services was re-designated as the Office of Managed Health Care. This office was given the responsibility for all TTUHSC managed care activities, including contracting with private and government payers to provide medical services to patients and for developing new lines of business. In order to more effectively contract for health care business, this office created a physician group practice organization with a private, non-profit status, which was named Texas Tech Physician Associates (TTPA). This physician organization became a partner in a health maintenance organization (HMO) called Texas Universities Health Plan (TUHP). TUHP was offered to State of Texas and higher education employees, retirees and dependents in Lubbock and several surrounding counties. Participation in TUHP at risk programs ended in the Fall of 2002, and TTPA will now focus more intensively on

the role of health services provider. Additionally, this office spearheaded the development of several new lines of business for TTUHSC and participating community physicians. These products include Texas Healthy Kids, the Children's Health Insurance Program (CHIP), and a health plan for TTUHSC residents and their dependents. This office also coordinates the participation of all four TTUHSC campuses in the Texas Department of Health's women and children's health initiatives in West Texas through the Title V Program. In recognition of the continued expansion in the correctional and managed health care areas, the office was reorganized and renamed the Office of Health Care Systems in December, 1999.

Other initiatives for Health Care Systems (HCS) include:

- Local contractual agreements with Lubbock Regional MHMR and El Paso MHMR;
- Responsibility for case management activities for high risk pregnant women and children participating in Medicaid or Title V Programs;
- Management of TTUHSC's marketing efforts;
- Provision of onsite health services for the 500-bed Ector County Detention Center and 48-bed Youth Center;
- Management of the TTUHSC Mobile Mammography program, which focuses on providing breast screening to the citizens of West Texas through mammography and clinical breast examinations. The Mobile Mammography clinic is accredited by the American College of Radiology and certified by the Texas Department of Health and the Food and Drug Administration.
- HCS supports the concept of localized delivery of outpatient-based health care through ventures such as Texas Tech Medical Center Southwest (TTMCSW) and the Laser Vision Institute. Located in the former Southpark Hospital campus, TTMCSW offers area consumers easy access to a broad range of primary care and the latest in outpatient surgical technologies.
- Developing and managing the Team Choice provider network.
- HCS assumed management of the Lubbock County Medical Examiners Office (LCME) in January, 2001. The LCME Office investigates deaths in Lubbock County and performs autopsies upon request for approximately 80 West Texas counties.

- The International Forensic Sciences Institute of the Texas Tech University System is being managed by Health Care Systems. The development of the Forensic Institute is presently being guided by an advisory group. Membership is composed of outstanding and dedicated professionals representing the general academic campus, the health sciences center, the law school and various community representatives. The advisory group will be developing goals, specific programs and implementation plans for the Institute. The purpose of the Institute is to be a world class center that integrates the disciplines or forensic sciences through academic programs, research, training and service.

RURAL AND COMMUNITY HEALTH

Texas Tech University Health Sciences Center exhibits its longstanding commitment to the health and well-being of the communities and rural areas of West Texas through the Office of Rural and Community Health. Established in 1997, this office develops and a wide range of rural health and community projects, which include assisting with the creation and implementation of sound rural health policies; focusing on health education and health workforce development; sponsoring and conducting applied research and policy analysis; providing telemedicine services and research; assisting with distance education services; providing scholarships; and publishing a nationally recognized publication dealing with rural health topics.

The Office of Rural and Community Health (www.ttuhscc.edu/ruralhealth) also acts as a rural health resources clearinghouse and serves as the primary liaison with communities across the 108 county TTUHSC service area. It is the goal of the Office to develop community partnerships, which provide both the framework and the mechanism for achieving the Office's mission of improving the health of West Texas.

Priority initiatives of the Texas Tech University Health Sciences Center Office of Rural and Community Health include:

- **West Texas Area Health Education Center (AHEC)** - The West Texas Area Health Education Program directs a variety of activities aimed at improving the supply, retention, geographic distribution, and quality of health care professionals in the region. AHEC projects provide continuing education for current health care professionals, clinical training for students and interns, and information to adults seeking career change. Among K-12 and undergraduate students, AHEC projects seek to create greater interest in rural health careers with mentoring and shadowing programs, summer camps, and health facility tours. The first West Texas area health education center, AHEC of the Plains, opened in Plainview in 2002, serving a 21-county area (www.ahecplains.org). Aided by a three-year \$2.5 million grant from the Health Resources and Service Administration, two more AHEC centers will open in 2004, and two more in 2005, covering all of West Texas.
- **Interdisciplinary and Community Projects** - The Office of Rural and Community Health sponsors and conducts a wide range of studies on the dynamics of health care access, on aging and chronic diseases that affect rural populations disproportionately, and

on issues of rural economic development. The findings of this work are regularly reported at national conferences and in peer-reviewed scholarly publications. An example of these projects is the Healthy Lubbock Initiative, which was launched in the Fall of 2003, to promote healthier lifestyles for Lubbock residents. The project will focus on community awareness and education about using diet, exercise and other activities to live healthier. Other projects include 1) an epidemiological study of childhood obesity, especially among Hispanics, and of the effectiveness of community-based, family-centered interventions; 2) children's health and fitness involving a partnership with school health professionals in the collection and analysis of Body Mass Index (BMI) and health status information of more than 15,000 students; and 3) a project in concert with the academic campus of Texas Tech University that employs geographical information system (GIS) technology to create a series of detailed maps on the landscape, people, economy, and health care needs of West Texas.

- **Telemedicine** - The Office of Rural and Community Health, through its Center for Telemedicine, is responsible for all telemedicine activities of the institution. The Vice President for Rural and Community Health serves as the TTUHSC Medical Director for Telemedicine. As one of the national pioneers of telemedicine, developing and expanding this state-of-the-art medical tool continues to be a priority of TTUHSC. From the inception of the TTUHSC telemedicine program in 1991 to its current level of more than 2,500 electronic patient examinations annually, the program remains on the cutting edge of telemedicine service, research, and education. TTUHSC telemedicine activities focus on serving as a resource for communities and providers interested in telemedicine, educating current and future health care providers about telemedicine, and assisting with the development of sound public policy on telemedicine. Telemedicine clinical services include prisons, rural clinics and hospitals, schools, and a growing focus area of nursing homes. TTUHSC also initiated the first Telepharmacy project in Texas in the Fall of 2002.
- **Texas Journal of Rural Health** - The *Texas Journal of Rural Health* is a quarterly journal published by TTUHSC. The only one of its kind in Texas and one of the few in the nation, the *Journal* focuses on quality articles, which address legitimate issues of rural health in areas such as policy, research, funding, and health care delivery. Any potential author is encouraged to submit relevant and current research studies, as well as legislative and health policy manuscripts.

All of these programs, activities and projects are elements of the goal of the Office of Rural and Community Health to develop comprehensive, sustainable programs that will reinforce the public health infrastructures of rural and medically underserved communities, increase the numbers of health care providers, improve access to health care, and reduce disparities in the health status of West Texas.

INFORMATION TECHNOLOGY

Texas Tech University Health Sciences Center uses a wide range of information systems technologies to support its academic and service missions. The Information Technology Division supports all the regional campuses, associated clinics and the Health Sciences Center's outreach to rural communities and prison units of the Texas Department of Criminal Justice. The division is comprised of the Technology Services, Information Services and HealthNet departments. The Technology Services and Information Services departments provide the institution with support services in the areas of PC support, server administration, networking, programming support, data management, and systems management. The scope of services include:

- ▶ Providing and supporting an ATM-wide area data network that supports all regional campuses and outlying clinics.
- ▶ Providing and supporting a high speed ATM or Gigabit Ethernet network infrastructure at all campus locations.
- ▶ Providing institutional support for over 4,000 personal computers and terminals across all campuses through telephone support and actual hands-on repair and replacement. This covers both hardware and software.
- ▶ Providing access to computer-based training on software programs and other technologies for students, faculty and staff.
- ▶ Providing and supporting Institutional data file storage, printing services, and e-mail services.
- ▶ Providing essential backup services of Institutional data.
- ▶ Providing support, maintenance and backup of departmental servers.
- ▶ Providing the institution with electronic security protection from outside intrusions and computer virus attacks.
- ▶ Providing and supporting Internet connectivity, including network connectivity on-site at each campus, dial-up services and remote Virtual Private Networking (VPN).
- ▶ Providing, designing and supporting WEB and other application development for academic and clinical information.

- **Digital Network**

The existing digital network infrastructure consists of an ATM or Gigabit Ethernet campus LAN environment with core speeds of 625 or 1,000 megabits per second, and ATM OC-3 (155 megabits per second) connectivity to each regional campus. The core infrastructure equipment that supports the primary Institutional servers operates at OC-12 (622 Mbits) transmission speeds. Data speed availability for faculty, staff and students is 10/100 megabits to the desktop. Data connectivity for students is available in several labs and in the medical library. Access to information resources exists through Texas Tech University's access to Internet 2. Currently Texas Tech University has an OC-3 connection to Internet 2 services. Additional collaboration with the general academic university is available through shared Student Information and Administrative Systems. Some of the shared administration systems include financial accounting, personnel and

payroll systems. Search engines for each campus cover information on web pages for both Texas Tech University and Texas Tech University Health Sciences Center.

- **Information Systems**

The Information Technology Division of TTUHSC provides file services, web-based reference material, interactive video teleconferencing for distance learning and telemedicine (TechLink and MedLink), discussion forums, and electronic mail – all used by the Schools to support their educational programs. Network file servers store educational materials that are created and/or accessed by the instructor for use in educational programs. Students also use network file servers to store and access peer tutoring and other educational materials compiled by students. TechLink services that are used to support instruction include interactive multimedia classrooms and web-based material/communications. These web-based services are provided so that educational material can be made available for student use by the departments responsible for teaching students. Web-based services are also used to distribute general announcements or information to faculty and students. All faculty and students are assigned e-mail addresses so that faculty-to-student, student-to-faculty and student-to-student communication is supported. Education is further supported through Internet availability for library resources, web-based materials, e-mail, and other information technology resources required for enhancing the educational experience.

- **HealthNet**

Recognizing the need for our outreach programs, the Legislature provided funding for HealthNet, an integrated healthcare education and rural practitioner support network, to sustain the educational and clinical outreach support mission of the Health Sciences Center. HealthNet maintains two telecommunication networks, TechLink and MedLink, to extend the academic and medical resources of TTUHSC to West Texas communities and beyond through interactive telecommunications. HealthNet also produces and distributes accredited medical education, an extension of TTUHSC's academic programs, to hospitals through Texas.

- **Educational Support**

The TechLink network connects 37 classrooms and 13 conference rooms on all TTUHSC campuses. Using state-of-the-art compressed digital video and audio technology, the network provides live interactive video teleconferencing capability among all campuses for research, administrative, teaching and other educational support activities. Carrying more than 12,500 event hours in fiscal year 2003, the network:

- maximizes the outreach and impact of limited faculty resources;
- provides quality undergraduate and graduate courses to students on all campuses;

- facilitates curriculum consistency and continuity; and
- reduces faculty and student travel among the campuses.

- **MedLink**

The MedLink network utilizes compressed digital video and audio transmitted via terrestrial circuits to provide Texans with direct patient care and information. The MedLink network includes more than 25 rural and correctional sites, and supports telemedicine activities through live interactive video consultations between medical specialists at all campuses of TTUHSC and Primary Care Physicians, Physician Assistants, Nurse Practitioners and their patients in West Texas and the state's correctional facilities. The network facilitates full motion picture quality video interactions among all parties and the transmission of critical patient information including diagnostic data and images. The practice of medicine through telecommunication technologies has increased access to quality healthcare in state correctional facilities and underserved rural communities. The availability of telemedicine services plays a vital role in enabling the rural community infrastructure to remain viable and healthy.

- **Educational Services Network (ESN)**

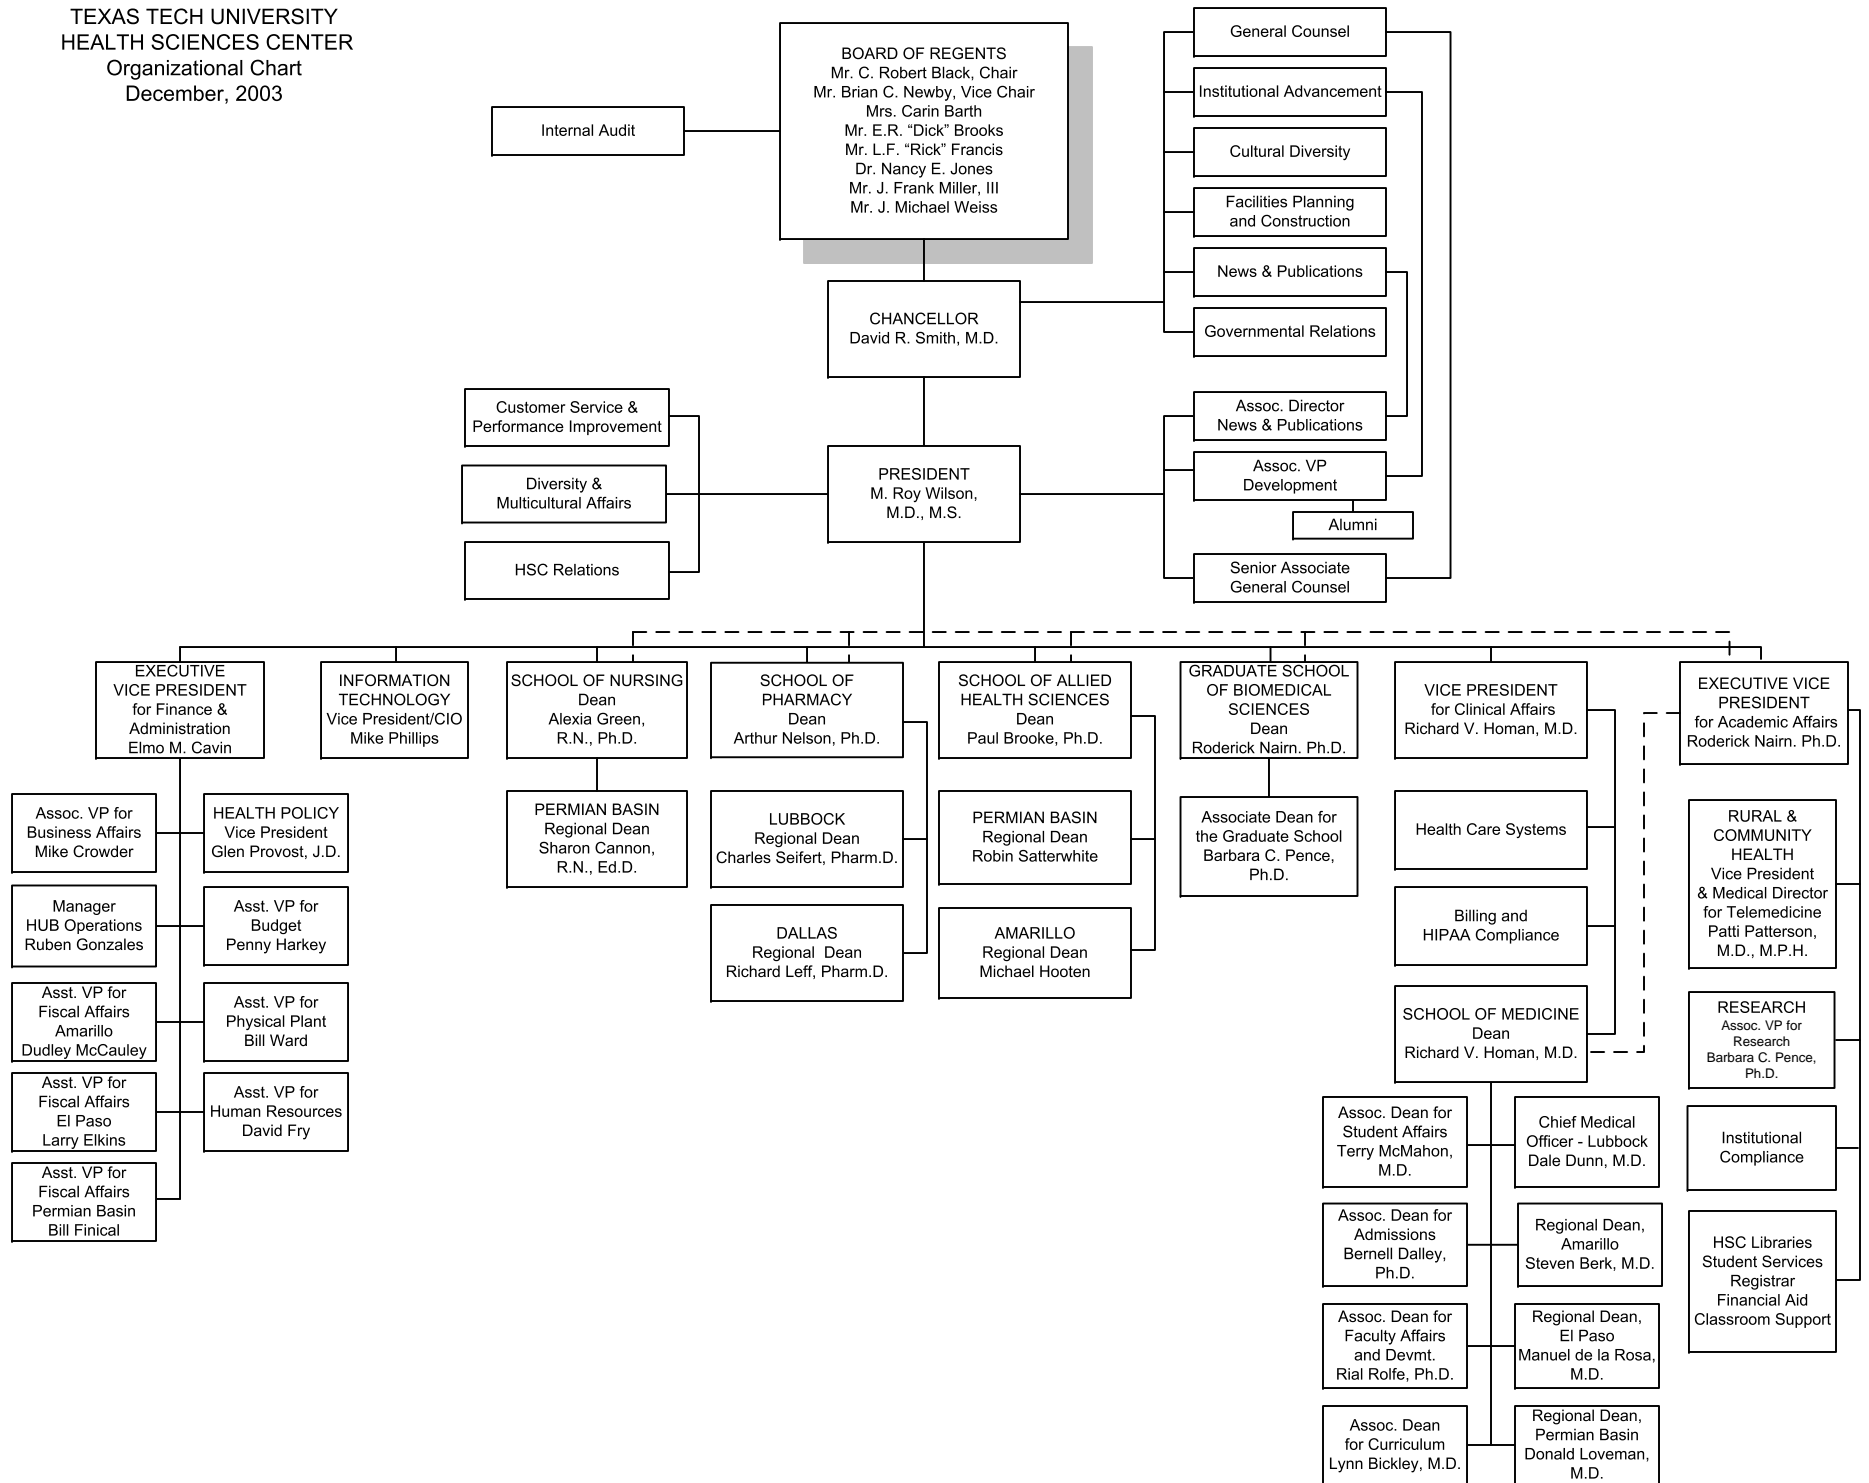

The Educational Services Network is a multi-format continuing education service. The ESN is supported by a comprehensive online learning management system. The ESN is used to extend the resources of health care facilities and professionals working in diverse health care areas. Over 200 hours of new continuing education and training programs are delivered to health care professionals and hospital staff annually. Continuing education programs are delivered via ESN to physicians, nurses and allied health professionals at more than 160 rural hospitals and clinics in all regions of Texas and Eastern New Mexico, with a national market of more than 400 hospitals and military sites throughout the United States. Extended accreditation periods and multiple cross-accreditation programming have increased the approved hours for healthcare professional disciplines to over 480 hours per year. Expanded programming, such as wellness, personal enrichment, safety, and patient and community education, has significantly added quality and value to the services offered. The use of the ESN has reduced professional isolation and has enabled practitioners to assimilate expert developments in their respective fields and to maximize the time they can devote to direct patient care. Studies have shown that regular use of continuing education and training programs has produced measurable increases in the quality and continuity of patient care in diverse healthcare settings.

LIBRARIES OF THE HEALTH SCIENCES

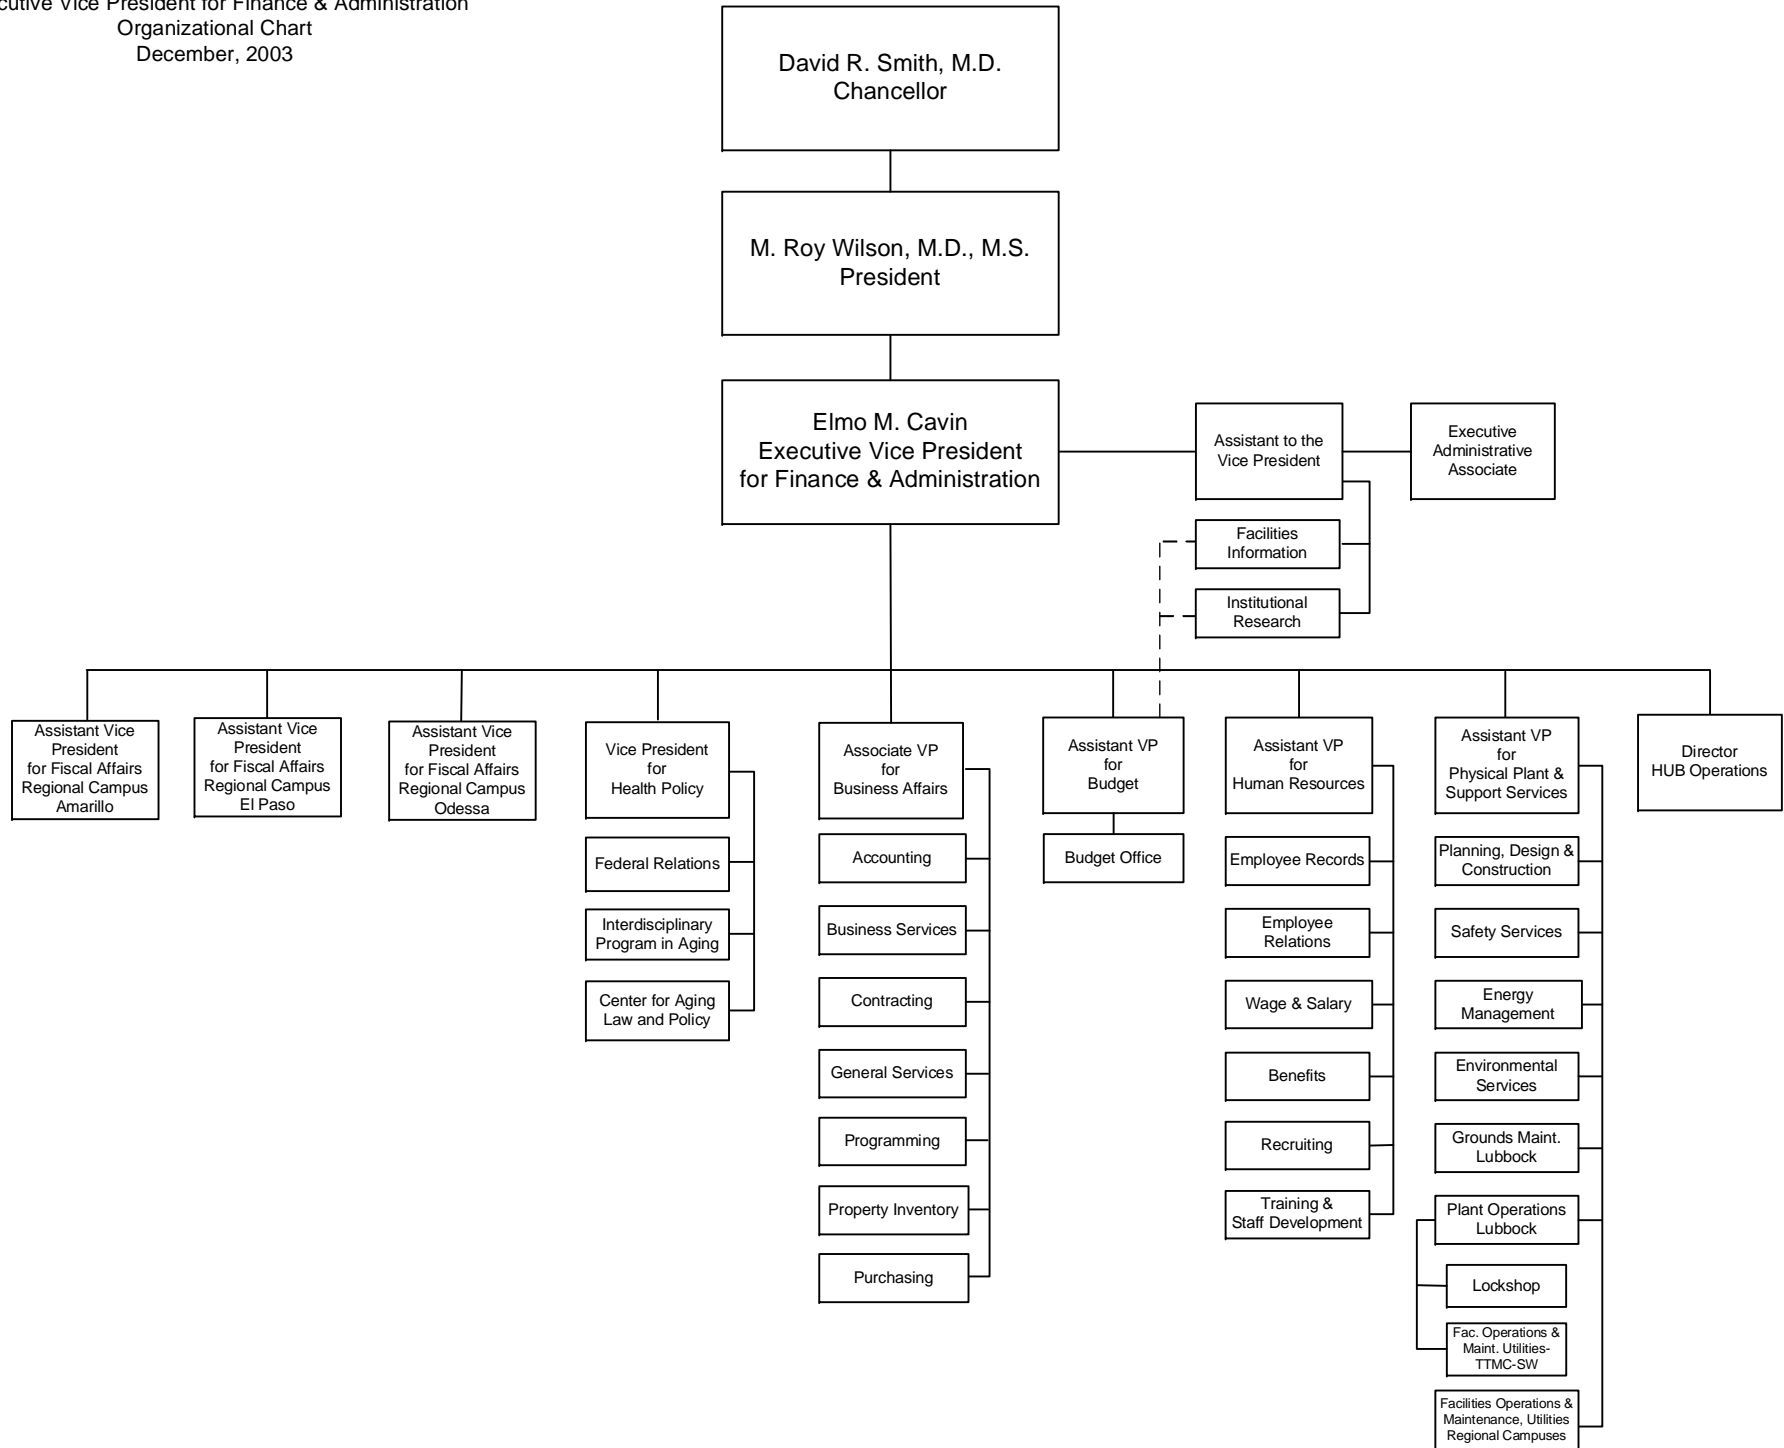

The Libraries of the Health Sciences, founded in 1971, exist to meet the curricular, research and patient care information needs of the students, faculty and staff of TTUHSC at Lubbock, Amarillo, El Paso and Odessa. By extension, the libraries also exist to meet the information needs of the larger biomedical and health care community of the 108 county West Texas service area of TTUHSC. The libraries, one at each of the four campuses, are staffed by 19 professional librarians, 2 administrative staff and 25 support staff. Professional librarians hold academic appointments in the School of Medicine's Health Communications Department and teach a variety of information management and computer courses to students of all degree programs within the HSC. The libraries of the TTUHSC system are fully computerized and share a common online catalog, as well as a variety of electronic databases. TTUHSC library users currently have access to over 2,500 electronic journals and over 24,000 electronic books. Through a proxy server, users may access this material from off-site locations as well. All four libraries have an electronic document reserve system and an electronic virtual reference librarian system to assist in the delivery of services to distance education students. The libraries currently have over 50 external contracts and service agreements in place throughout the urban and rural areas of West Texas, in order that we might provide biomedical information support to unaffiliated health care-related entities. In the fall of 1997, the three remote campus libraries at Amarillo, Odessa and El Paso added a significant number of hours of operation (nights and weekends) to expand opportunities for service to users. The Lubbock library hours are currently 105 per week. In the summer of 1998, the Lubbock library (Preston Smith Library of the Health Sciences) moved to a new 50,000 sq. ft. facility. It features 28 group study rooms for use by TTUHSC students, a 64-workstation computer lab and adequate space to consolidate all library collections in one location. The need for remote storage of resource material was thereby eliminated. In the Summer of 2000, the El Paso Library was named the Delia Montes-Gallo Library of the Health Sciences.

* Students sitting for the professional examination in Physical Therapy are not required to report their scores to the department. Therefore, most do not, and we only have data for those who choose on the score report to have their "home department" receive a copy. Since they take the test after they have graduated, we have no mechanism to enforce reporting.

NOTES:

1. The breakout above shows the distribution of Academic Administrators in their respective locations, although Academic Administrators are actually counted as a staff group (02) in the President's Division in the Affirmative Action Plan (AAP).
2. There are 22 academic administrators this Fall, 2003.
3. Eighteen El Paso Health Care Systems staff are counted in Lubbock totals due to the administrative structure.
4. Employees attached to the Texas Tech University System are counted in that section of the Affirmative Action Plan. They are not reflected in the above totals.

*Revisions have been made to FY 2000 and 2001 visits and patients served numbers due to business operation changes at the Amarillo campus.

PERFORMANCE MEASURES

**TEXAS TECH UNIVERSITY HEALTH SCIENCES CENTER
PERFORMANCE MEASURES**

MEASURE	FY 2002	FY 2003
MEDICAL EDUCATION		
Percent of students passing part 1 or part 2 of the national licensing exam on the first attempt	92.00%	91.00%
Percent of graduates entering a primary care residency	45.00%	47.00%
Percent of graduates practicing primary care in Texas	23.60%	30.18%
Percent of graduates practicing primary care in a Texas under-served area	4.44%	1.82%
Percent of residency completers practicing in Texas	49.20%	50.38%
Total gross charges for unsponsored charity care provided by faculty	58,042,893	63,105,618
Total gross charges for patient care (excluding unsponsored charity care) provided by faculty	160,933,964	156,586,941
Outpatient-related charges as a percent of all charges by faculty	56.00%	53.97%
Percent of charges to managed care contracts by faculty	21.00%	19.71%
Medical School enrollment	487	499
Minority admissions as a percent of total M.D./D.O. admissions	11.72%	7.69%
Total number of residents	508	514
Minority residents as a percent of total residents	23.60%	25.29%
Minority graduates as a percent of total M.D./D.O. graduates	3.42%	0.00%
Total number of outpatient visits	775,725	715,557
Total number of inpatient days	196,655	204,575

MEASURE	FY 2002	FY 2003
GRADUATE BIOMEDICAL SCIENCE EDUCATION		
Graduate School enrollment	97	97
ALLIED HEALTH EDUCATION		
Percent of graduates passing the certification / licensure exam on the first attempt	94.00%	79.25%
Percent of graduates who are licensed or certified in Texas	91.00%	86.32%
Allied Health enrollment	549	680
NURSING EDUCATION		
Percent of BSN graduates passing the national licensing exam on the first attempt in Texas	92.86%	94.74%
Percent of BSN graduates who are licensed in Texas	93.98%	96.23%
Percent of MSN graduates granted Advanced Practice Status in Texas	75.00%	84.62%
Nursing School enrollment	436	480
PHARMACY EDUCATION		
Percent of graduates passing the national licensing exam on the first attempt	100.00%	93.85%
Percent of graduates who are licensed in Texas	91.37%	91.67%
Pharmacy School enrollment	324	363
CONDUCT RESEARCH		
Total external research expenditures	12,529,674	11,965,506
Research expenditures as a percent of state appropriated expenditures	13.55%	13.01%
Research expenditures as a percent of state appropriations for research	513.68%	509.92%
INSTITUTIONAL SUPPORT		
Administrative Cost	3.73%	3.59%

MEASURE	FY 2002	FY 2003
INSTITUTIONAL UNIQUE MEASURES		
Annual event hours of distance education	86,958	99,368
Total value of lost or stolen property	\$8,920.32	\$14,045.28
Lost or stolen property as a percent of total inventory	0.0272%	0.0552%
ALL SCHOOLS		
Total number of post-doctoral research trainees	31	33
Minority admissions as a percent of total first-year admissions	15.30%	15.50%
Total number of degrees or certificates awarded	559	565
Minority graduates as a percent of total graduates	10.78%	13.50%
